

## TANZANIA!

Mrs Santoro visited our partnership school in Tanzania where she worked with, and learnt from our colleagues at

Mlimwa Primary School.

The Tree of Good Turns has been introduced as a means of positive rewards for demonstrating fruits of the spirit and our personal goals. We discussed the attributes that make great learners and created our own "Tree of Good Turns" –We made it out of old envelopes and recycled paper. It is a great way of sharing our ideas and working together

Thanks to our generous community and a local football team, we were able to bring over 100 sets of football kit, including boots and socks! Our Mlimwa boys and girls were very excited to have their own team kit!

We have shared different teaching methods- the children loved the challenge of the "24" game! They also enjoyed group work and role play developing fruits of the spirit and personal goals

We discussed the vision we have for each of our schools and we agreed that we all wished to be mindful of our individuality but also to share our goals. We designed our own charter sharing what we believe to be important goals, such as cooperation, communication, resilience, adaptability, respect, enquiry and thoughtfulness.

Life at Mlimwa is very different from here at St Leonard's. There are often 90 children in a class! Every morning the children come in and clean the school, sweeping, watering the plants and preparing the lunch.

As part of our shared water project, and as a result of Madame Theresia coming to St Leonard's, a trip was arranged to the water plant outside Dodoma. This was the first ever trip! Also see how many children squeezed into the coach!
